SELECTED PETUNIAS

Our Petunia seeds are of the finest quality, grown by the best growers in California and Japan from selected plants, and are hand pollenized; no matter how careful the selection, you sometimes will find a few plants which revert to the old type; these usually bloom first. This is a natural habit of Petunias. No pot plant is more profitable or satisfactory than a fine pot plant of Petunias.

DOUBLE PETUNIAS

Silver Blue. Now available to the trade, a clear blue without marked venation formerly in this color. The flowers are large and well fringed.

All-Double Dwarf Giant Fringed Mixed (Victorious). The flowers are very large, exquisitely ruffled and fringed. Our mixture contains a very large per cent of separate colors, thereby giving you a better balanced color range than has been ever offered.

DOW WOOD PRESERVATIVE

Dow Wood Preservative is a pentachlorophenol concentrate that lengthens the life-span of wood many years. It repels attack by termites and other wood-destroying insects and prevents decay due to excess moisture. Treated posts are protected against decay and attacks by termites and other wood destroying insects. To prepare a ready-to-use treating solution containing approximately 5% by weight of the preservative chemicals, dilute one gallon of this concentrate with four gallons of a suitable petroleum solvent, such as light Diesel oil, fuel oil (No. 1, 2, or 3 distillate) or kerosene, and stir the mixture well.
